President Poroshenko and Prime Minister Yatsenyuk,

**Re: immediate cessation of covert depopulation measures**

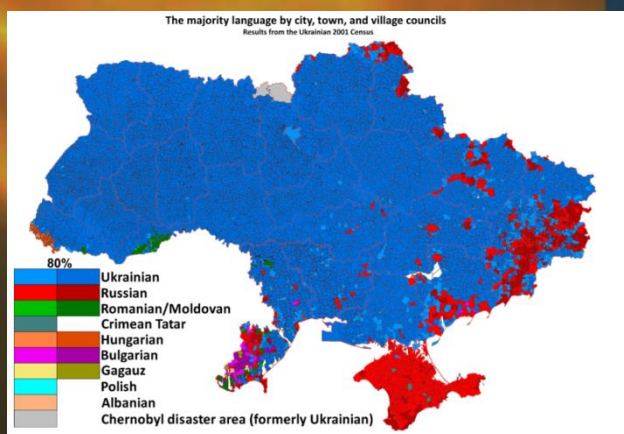

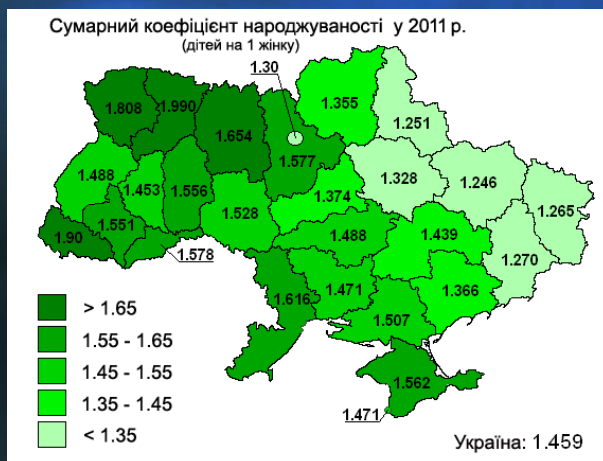

“Ukraine Has Not Yet Died”, according to your national anthem, but it is dying. Between the atrocities committed by the Nazis (systematic depopulation in preparation for German colonization, forcible conscription into the German army) and the Soviets (the Holodomor famine, the Stalinist purge of “nationalist deviationists”, and the Great Terror) Ukraine has lost a quarter of its population and four-fifths of its cultural elites to war and ethnic cleansing between 1930 and 1950.

From 1950 until your independence from the Russians in 1991, you were subjected to a covert depopulation program by fluoride and vaccines orchestrated by the US, UK, and the Soviet Union, with the tacit cooperation of China and France, at the UN Security Council level. As a result of this scientific genocide, births have been going down and deaths have been going up throughout these four decades. The total fertility rate declined from 4 to 1.8 children per woman and the crude death rate went from 8.8 to 11.9 deaths per 1000 during this period. As if on cue, your population has been decreasing since 1991, the year of your independence, when the engineered genocide passed from Russian into Western hands and was accelerated and intensified with chemtrails and toxic food imports.

From 1991 until today you have lost 6.5 million people or 12.5% of your population and you now have more old than young people and a high dependence rate, which are the typical features of a country that has reached the last stage of the demographic transition.

What is peculiar about your demographic trends since your independence from Russia and your close cooperation with the West, is that you have used the covert program of depopulation to engage in ethnically cleansing your country of Russians, which is why the total fertility rate is lower and the death rate higher in the eastern provinces of your country, where the population is mostly Russian, than in the rest of the country where it is homogeneously Ukrainian. This is undoubtedly one of the reasons that led to the conflict with Russia over Crimea.

Given the horrors and injustices you have suffered for the past century due to Russian aggression, one can understand your desire to turn the tables on the Russians and free your country from their presence. Unfortunately, this policy of reversed ethnic cleansing has forced the Russians to protect the overwhelmingly Russian population of Crimea by annexing it to Russia. Of course, since the Russians are using the same covert methods of depopulation on their Circassian

and Tatarstani ethnic minorities, both of whom are Sunni Muslims, as well as on the Old Believers who multiply too fast and challenge the authority of the Russian Orthodox Church, the Russian government cannot openly declare their true reasons for the intervention in Crimea.

You can continue to commit genocide and target your minorities with extra fervor, in which case you will most likely lose the entire eastern side of your country to Russia, or you can help me forge global consensus for worldwide population control legislation, which will ease the tensions between you and Russia and return the world to sanity.

You have emerged from lowest-low fertility (defined as total fertility below 1.3) in 2008 by providing child support, but you will not bring your total fertility rate up to replacement level

until you stop all covert methods of depopulation and protect your people from poisonous food and beverages imported from western Europe, which are laced with endocrine disruptors, and stop vaccinating your people with adulterated vaccines and poisoning them from the air with chemtrails. To achieve a stabilization of your population at the desired, sustainable level you must stop the genocide and pass proper laws. If you do not, you will end up in front of a firing squad in the not so distant future.

You have lost 60% of your GDP from 1991 to 1999 and have suffered high inflation rates not because you changed from a centrally planned to a free market economy but because you were losing 150.000 people a year due to low fertility rates. You now lose seventy to ninety thousand people per year and your economy has improved slightly but will remain in recession so long as your population continues to decline.

As Secretary of the National Security and Defense Council of Ukraine since 2004, you, President Poroshenko, are personally responsible for carrying out the war of attrition on your own people through chemical, biological and bacteriological weapons.

Ukraine is too important geopolitically to be left alone. The world has always fought over the territory that is now Ukraine because it is the breadbasket of Europe and is again fighting over it because food is needed now more than ever as the population is still growing and an additional three billion people will have to be fed by 2050. In addition, Russia will be severely weakened without Ukraine and can then be forced to abandon its independence and be subsumed by the globalized world, which can pave the way for nuclear disarmament and ultimately lead to a borderless world. Of course, the current Russian leadership is fully on board this plan and plays its part in order to exhaust nationalist elements at home and abroad.

While I am eager to see the world get rid of nuclear weapons and borders, I will never condone the annihilation of civilians so long as a viable alternative is available, namely the inclusion of the 99% in the plans of the 1% so we can pursue peace and prosperity through legal and ethical means.

I hope you will abandon the genocidal lobby by joining me so that together we can forge global consensus for a worldwide population control law. If you do not, your future is grim and your names will forever be inscribed in history as that of mass murderers.

Sincerely,

Kevin Galalae
